AGCW - SEATTLE

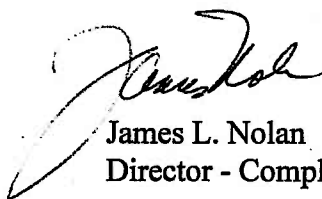

Dear Mr. Fernow:

Ash Grove Cement Company
Order of Approval No. 3382 (NC 3382)

Thank you for your December 3, 1993 letter concerning our December 1 meeting. Based on the data presented at the meeting, we agree that Ash Grove may use the existing, non-certified SO₂ analyzer as a method for determining compliance with the SO₂ emission standards in Order of Approval No. 3382, until a new SO₂ analyzer is installed and certified. This agreement is based on the premise that the existing SO₂ analyzer is reading too high and that its replacement will take approximately six months.

We understand that the NOx monitor has been certified; however, we have not yet received a copy of Ash Grove's certification test for the monitoring system. Please send a copy of the certification test report as soon as possible, so we may make a final determination concerning certification of the NOx monitor and use of the existing SO₂ monitoring system.

Sincerely,

James L. Nolan
Director - Compliance
